FOR IMMEDIATE RELEASE, July 19, 2010

**Mill Log Wilson Equipment Ltd. Hires Electronic Service Technician for Alberta**

Edmonton, AB – Mill Log Wilson Equipment LTD. announced today the hiring of Darryl Lowery as an Electronic Service Technician. Darryl will be involved with the electronics and engine controls side of our highly successful Twin Disc Distributorship within Mill log Equipment's targeted regions. He will work closely with Operations Manager-Dean Belcourt at the Edmonton Branch as well as the rest of the Mill Log Equipment Team and will report directly to Mill Log Wilson Equipment LTD. Service Manager, Ed Lazarenko.

"Darryl has a high level of technical knowledge and brings extensive electrical experience to our team", said Dennis Hoff-President, Mill Log Group of Companies. "As an oil equipment electrical designer and field service technician, Darryl has the knowledge and expertise to take Mill Log Wilson's service and support efforts to another level."

Mill Log Wilson Equipment LTD. serves as a distributor of high quality Twin Disc transmissions, pump drives, power take-offs, clutches, engine controls and the newly developed Torsional Vibration Analysis division within the Industrial and Marine equipment industries.

**About Darryl Lowery**

Darryl has an extensive background in the oil field industry and has spent extensive time working abroad in Russia, India, South America and several other oil-producing countries. He previously worked for Crown Energy Technologies as a Field Service Electronics Technologist. Darryl resides in Edmonton, AB and enjoys spending time with his wife and two children.

**About Mill Log Equipment Company**
